

DeEtta's RSV Story

“As a first-time mom, I didn't know much about RSV.”

“But when my 4-month-old stopped eating and her breathing became shallow, it was terrifying.”

“When the doctor said he wanted to admit her to the hospital, I became even more concerned.”

“Our baby girl being admitted to the hospital will forever be ingrained in my mind.”

RSV places a real burden on babies and families like DeEtta's.
